

SCIENCE HEROES™

powered by Talewise

Science and stories collide in this fun, interactive S.T.E.M. program! Join us on an adventure about Professor Noble and the Science Heroes, who must save their town – and the planet – from a super-polluting mastermind!

The audience helps the performer act out the tale, as we use the events in the story to discover and explore several exciting science concepts – like Newton’s laws of motion, air pressure, chemical reactions, and more!

Volunteers help conduct each experiment as the whole audience gets involved in changing variables and making predictions. We’ll even bring some experiments out into the crowd for all to see.

Experience the fusion of science and stories with Science Heroes:
“Saving Earth Together”!
